

# Accessible data - At what cost?

1a • If the software is addictive...

- ~~time~~ enough resources to use
- everyone understands importance
- open up time to get involved

- make advantage of use visible (instant gratification)

- circuit of visiting Iris BA

- good training, user friendly <sup>user</sup>

- support & value horticulturalists (2 other staff)

- endurance for quality

1b) What would be the cost?

• ~~What~~ (not)  $\Rightarrow$  being a BG!

• <sup>-20%</sup> 10% of working time

• (not) lost of reputation, no viability

• investment (not a cost)

$\hookrightarrow$  will save time

• more concurrent user licences

• Overlapping tasks costs time

• How to cover costs:

collection / quality  $\uparrow$

$\rightarrow$  develop <sup>numbers  $\downarrow$</sup>  ~~qualifiers~~ for the quality of the collection

$\rightarrow$  shift reporting from

size to use (quality)

$\Rightarrow$  What's the benefit?
