## Inventories and labeling in in practice – "The Rock Garden"

## The Rock Garden

- Contains about 4500 accessions.
- Mainly perennial material.
- A large number of new accessions are added yearly.

# The Rock Garden

- Divided geographically.

## The Rock Garden

- Divided geographically.
- Each bed has a code letter.

## The Rock Garden

- Devided geographically.
- Each bed has a code letter.
- Each Item has a reference number (Loc. Ref.)

## The Rock Garden

- Devided geographically.
- Each bed has a number.
- Each Item has a reference number (Loc. Ref.)

## The Rock Garden

- Divided geographically
- Each bed has a code letter
- Each Item has a reference number (Loc. Ref.)
- Inventories are updated in IRIS during winter.
- All inventories and updates are carried out by horticulturists, with occasional help from botanists.

Gardeners are responsible for the work flow which is great.

Sometimes gardener become too independent from botanists who may feel they lose control.

One risk is that we only inventory labels, without ensuring that botanists can serve gardeners, so that they are involved, yet have time to curate the collection.

## Inventories and labeling in in practice – "The Bulb Collection"

## The Bulb Collection

- Contains about 6000 accessions.

## The Bulb Collection

- Contains about 6000 accessions.

## The Bulb Collection

- Contains about 6000 accessions.
- New accessions are added yearly.

## The Bulb Collection

- Contains about 6000 accessions.
- New accessions are added yearly.
- Replanted annually

Today, inventories are made at very long intervals, and only as the bulbs are replanted.

It's difficult to make inventories during the active phase because of tight positions between plants and labour intensive period in the spring.

We still struggle to find a work flow that enables us to make inventories every year.

## Inventories and labeling in in practice – 3. The Suckulent Collection

# Nursery

Public greenhouse
